

Why choose  
**MultiWave Networks?**

# Focus

Founded in 2016, MultiWave Networks Pty Ltd is a privately owned and funded company focused on bringing **nbn™** broadband services to regional and remote Australia. Our wholesale (B2B) business model empowers local providers to deliver **nbn™** services, utilising all the benefits of their regional knowledge and understanding.

As an experienced B2B provider, we:

- Have a very strong partnership focus, delivering robust solutions tailored to our customers' needs
- Understand the communications challenges of remote businesses
- Are solely focused on the provision of **nbn™** products and services for regional and remote Australia
- Have an excellent relationship with NBN Co, being one of the top **nbn™** satellite RSP's for a number of years

## Flexibility

Our Partners may use our services directly, or on-sell them to third parties using their own brand. Also, Partners can interface directly to our network, or have MultiWave manage all the traffic carriage aspects

## Industry knowledge and relationships

There remain unique challenges in serving regional and remote Australia, particularly in respect of the low population density and the lack of telecommunications infrastructure.

Our operational experience enables us to be more than a pure wholesaler, offering the benefit of our industry relationships to assist with the challenges in serving this market.

# Solutions Specialists

The MultiWave Networks team are all highly experienced and combined have many years of experience in relevant telecoms technologies. We bring this expertise and experience to work with your teams and tailor solutions to fulfil your communication needs in regional, rural and remote Australia.

## Value and Service

At MultiWave Networks, we pride ourselves on:

Making every effort to provide extremely competitive ongoing fees, as such we typically offer lower monthly service fees

Highly responsive service support and implementation advice that we can provide as a relatively small, nimble organisation and dedicated nbn regional specialist RSP

## System Capabilities

- Ordering and service management portal
- Branded end user usage messaging and notifications
- Wholesale and retail billing capabilities
- Comprehensive service monitoring and management
